

# Working with HostDime Cloud

Welcome to the HostDime Cloud, where you can create highly available and scalable cloud servers on HostDime's infrastructure.

Dive into the page tree below and begin configuring your virtual machine to your liking!

<a href="#">Access a Virtual Machines Page</a>
<a href="#">Access the Template Store Section</a>
<a href="#">Add IPs to a Virtual Machine</a>
<a href="#">Change Port to Access Virtual Machine via SSH or RDP</a>
<a href="#">Console a Virtual Machine</a>
<a href="#">Create a Backup of a Virtual Machine</a>
<a href="#">Create a Template Group</a>
<a href="#">Delete a Virtual Machine</a>
<a href="#">Enable Autoscaling for a Virtual Machine</a>
<a href="#">Make an Update to a Private Template</a>
<a href="#">Make a Template (Image) of a Virtual Machine</a>
<a href="#">Modify the CPU and Memory Values of a Virtual Machine</a>
<a href="#">Reboot a Virtual Machine</a>
<a href="#">Redeploy a Virtual Machine</a>
<a href="#">Remove IPs from a Virtual Machine</a>
<a href="#">Restore a Virtual Machine from Backup</a>
<a href="#">Start a Virtual Machine</a>
<a href="#">Stop a Virtual Machine</a>
