How To Retrieve Plesk Admin Password

How to Retrieve Plesk Admin Password Via Remote Desktop

In the event your Plesk admin password is different from your admin remote desktop password, you can easily retrieve this password if forgotten. Here's how:

a. Connect to the server via Remote Desktop.

a. From the Start menu, select the Run... option and type in "cmd".

- This will open up the command prompt.

a. Enter in the following to retrieve the current Plesk admin password:

- `"%plesk_bin%\plesksrvclient" -get`
