

# How to Request Additional IPs

This article covers how to request additional IPs directly through your CORE accounts.

1.) Log into your CORE account at <https://core.hostdime.com>

2.) Select your service from the drop down menu under Hosting Solutions.

3.) Click 'Request Additional IPs'.

## Dedicated Servers

 View All Servers

 View Reboot Requests

 Request Additional IPs

	ID	↓ Hostname
	HD13899	teameditertest.hostdime.com
	<input type="text" value="ID"/>	<input type="text" value="H"/>

4.) Fill out the justification form as necessary. Example can be seen below.

Organization Details

Create Request Ticket

5.) Once you've completed the form, click the orange button to create a new ticket with our Network Admins.

After your justification form has been received and approved, our team will add your new IPs and update your billing profile. If you have any issues with the steps above, please feel free to open a ticket or live chat with our Sales team.
