How to Create a Package in cPanel
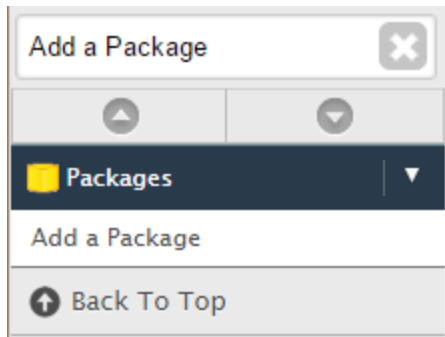

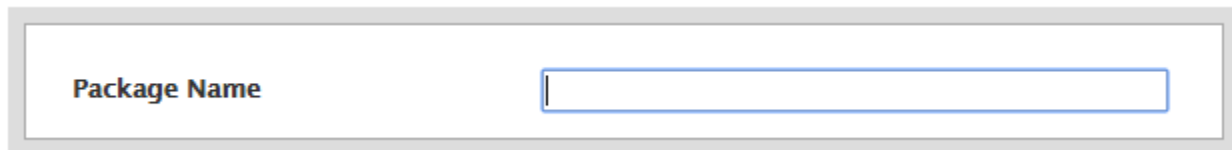

1) Log in to your WHM: SERVER-IP/WHM.

2) Type "Add a Package" in the search box at the top left and click the menu item.

3) Type a name for the package.

4) Select the desired amount of resources.

Resources

Disk Quota (MB)	○ 0	● Unlimited
Monthly Bandwidth (MB)	○ 0	● Unlimited
Max FTP Accounts	○ 0	● Unlimited
Max Email Accounts	○ 0	● Unlimited
Max Email Lists	○ 0	● Unlimited
Max Databases	○ 0	● Unlimited
Max Sub Domains	○ 0	● Unlimited
Max Parked Domains	● 0	○ Unlimited
Max Addon Domains	● 0	○ Unlimited
Maximum Hourly Email by Domain Relayed	○ 0	● Unlimited
Maximum percentage of failed or deferred messages a domain may send per hour	○ 0	● Unlimited

5) Select the desired options: Dedicated IP, Shell Access, CGI access, and Digest Authentication at account creation.

6) Select your cPanel theme, feature list, and locale

7) Click "Add" and you will see "Creating new package Package_Name" loading bar and then a subsequent "Success!" on the bottom of the page.
