

How to Reissue an SSL

Step 1: Log into your **CORE Client Profile** via <https://core.hostdime.com> OR <https://core.hostdime.co.uk>

Step 2: Scroll over the "Services" tab and click on "SSL Certificates." Locate your SSL addon and click on the blue renew button on the right side.

SSL Certificates

Certificates				
Domain	Ssl Type	Cost	Expires	Status
domain.com	Essential SSL Certificate - domain.com	\$30.00	2016-11-26	issued

Step 3: Enter a new CSR and select an email for the validation to be sent to. You can generate a CSR here: <http://www.dimenoc.com/tools/ssl/> ((IMPT: **SAVE THE RSA KEY!!!!**))

-OR-

Inside of the cPanel account in which the key will save directly to the server. Follow the steps outlined here: <https://www.hostdime.com/resources/generate-csr-rsa-key-via-cpanel/>

Step 4: Click Reissue Certificate. Once you complete the validation email, your new SSL file will be issued.

Step 5: Install the new SSL files.

**You can use the following easy guide: <https://www.hostdime.com/resources/install-ssl-via-whm/>*

**If you are a Shared or Reseller client, please contact our Sales Team for installation.*
