

How to Determine Your cPanel Version

cPanel adds new features and functionality all the time. Sometimes when trying to assist you, it is good to know what version of cPanel is running on your server.

1. Log into your cPanel account
2. On the right side of the screen, click "Server Information":

The screenshot shows the 'GENERAL INFORMATION' section of a cPanel interface. It includes fields for 'Current User' (yourdomain (yourdomain.com)), 'Primary Domain' (yourdomain.com), 'Shared IP Address' (redacted), 'Home Directory' (/home/yourdomain), 'Last Login IP Address' (redacted), and 'Theme' (paper_lantern). Below these fields is a link labeled 'Server Information' which is highlighted with a red rectangular box. At the bottom of the section is a dark blue bar labeled 'STATISTICS'.

3. You should see the cPanel version listed here along with other software versions. The server in the image below has version 76.
